

MOHAMED ASHFAQ S

Java Full Stack Developer

Mobile No: 91-9597659599

Email Id: mohamedashfaq01@gmail.com

Address: Chennai

Experienced Java Full Stack Developer with 10 years of hands-on experience in developing enterprise web applications using Java, Spring Boot, Angular. Proven ability to deliver end-to-end features, enhance application performance, and maintain production stability. Focused on writing clean code, improving system stability, and contributing effectively to team success.

Professional Summary

- Java Full Stack Developer with 10 years of experience in designing, developing, and maintaining scalable web applications using Java and modern frontend technologies. Strong expertise in Java, Spring Boot, REST APIs, Microservices, and Angular.
- Experienced in building responsive user interfaces, developing robust backend services, integrating third-party APIs, and improving application performance. Proven track record of resolving production issues, enhancing system stability, and delivering quality features in Agile environments.
- Recognized for strong ownership, problem-solving ability, and consistent on-time project delivery.

Career Timeline

Nov 2024 - Present	Technical Lead BNP Paribas
Jul 2019 - Nov 2024	Senior Software Engineer Altimetrik India Private Limited
Mar 2018 - Jul 2019	Associate Consultant Capgemini
Oct 2015 - Mar 2018	System Trainee Virtusa-Polaris Pvt Ltd.

Work Experience

BNP Paribas

Working as a Full Stack Developer on enterprise banking applications, handling backend feature development, security remediation, module enhancements, system integrations, defect resolution, and ensuring smooth production deployments

- Involved in the design, development, integration, and testing of web applications while ensuring stable production deployments
- Collaborated within Agile teams, actively participating in sprint planning, Scrum ceremonies, and code reviews to deliver high-quality solutions.

Projects:

HBCI (Home Banking Computer Interface)

- Implemented two major banking features: SEPA Instant Payment and Verification of Payee (VoP).
- Took complete ownership as an individual contributor, understanding the legacy codebase through detailed code walkthroughs and SharePoint documentation.
- Resolved security vulnerabilities identified through Fortify security scans to enhance application security.
- Designed and delivered end-to-end backend implementation, including integration with external supplier systems.
- Collaborated with the Data Design team to manage external dependencies and interface contracts.
- Successfully deployed to production with zero post-release defects.

Consors Bank - WLVP Application

- Enhanced application modules utilizing Web-Bricks, a custom wrapper over Web Components.
- Improved application stability and user experience by resolving over 20 existing bugs.
- Implemented new backend endpoints to enable additional features and functionalities.
- Ensured code quality and standards compliance through rigorous code reviews and remediation of code smells.
- Maintained code reliability through the development of comprehensive unit test cases.
- Facilitated onboarding and knowledge transfer via preparation of detailed technical documentation.

Altimetrik India Private Limited

Responsible for end-to-end full stack development including REST API design, module development, UI implementation, third-party integrations, performance optimization, and unit testing across enterprise web applications.

Technical Skills

- Backend:** Java 8+, Spring Boot, Spring MVC, Spring Security, Hibernate, RESTful APIs, Microservices, Log4j, JUnit
- Frontend:** Angular (8+), ReactJS, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Highcharts, PrimeNG, Material UI
- Databases:** MySQL, Oracle, H2
- DevOps & Cloud:** Git, Jenkins, CI/CD Pipelines, Maven, Gradle, Docker, Kubernetes, OpenShift, AWS, Linux, Postman, OpenAPI / Swagger
- Tools & Methodologies:** Agile (Scrum), Jira, IntelliJ IDEA, Eclipse, VS Code, TDD, BDD, SonarQube, Code Reviews, Github Co-pilot,

Education

- B.E (CSE)** CAHCET, Melvisharam

Achievements

- Awarded "The DREAM TEAM" for exceptional teamwork and project contributions within Cardinal Health-Pharma-Syntrac.
- Received GEM (Going the Extra Mile) Award for outstanding performance and dedication to project objectives.
- Earned multiple client and manager appreciations for consistently delivering projects on time, maintaining high code quality, and fostering effective team collaboration.

Projects:

DriftIn & DEX (Digital Employee Engagement Platform)

- Designed and developed robust RESTful APIs using Spring Boot to support various CRUD Operations and features of the DEX web app.
- Developed and maintained core modules such as Requisitions, Events, Candidates, Interview Process, and Candidate Dossier in the DriftIn application.
- Designed intuitive, responsive user interfaces using Angular, HTML5, CSS3, and Bootstrap/PrimeNG.
- Enhanced user experience in DriftIn application through the development of intuitive and responsive user interfaces.
- Implemented performance optimizations including lazy loading and code splitting for enhanced UX.
- Led the integration of third-party services and APIs, such as Amber (an AI-powered chatbot aiding HR leaders in employee engagement and retention), ensuring seamless functionality within the application.
- Built the DEX Admin console independently using ReactJS and Material-UI, enhancing content management workflows.
- Collaborated with cross-functional teams for smooth delivery, API design, and integration.
- Performed unit testing using JUnit to ensure code reliability before production deployments.

Heavy Duty Verify (HDVerify)

- Developed application features using TDD and BDD methodologies to ensure reliable and maintainable code.
- Implemented unit and integration tests using JUnit and Angular Karma to improve test coverage and stability.
- Designed and developed core application screens using Angular 8.
- Built production-ready code in a continuous delivery environment, supporting smooth deployments.
- Collaborated with stakeholders to resolve technical challenges and contributed to user story creation and code reviews.

Capgemini

Responsible for full stack development of key project tracking modules, including role-based access implementation, REST API integration, dynamic chart visualization using Highcharts, and UI enhancements.

Project: RealTrack TM (General Electric Project)

- Developed key modules and widgets including Construction, Project Deck Summary, Inspection & Test Planning, Billing Milestone, and Billing Forecast for a web-based project tracking platform.
- Implemented role-based access to dynamically enable modules based on user roles and project configurations.
- Integrated and rendered Highcharts (Line, Bar, Pie) using dynamic data from REST APIs to visualize project metrics.
- Designed and implemented a full-calendar widget with event management and interactive popups.
- Resolved complex functional and UI issues, improving application stability and user experience.

Virtusa-Polaris Pvt Ltd.

Handled backend and frontend development for a healthcare web application, implementing CRUD modules, invoice and alert management features, Angular UI components.

Project: Cardinal Health - Pharma-Syntrac

- Contributed to transitioning a healthcare desktop application into a web-based platform, enhancing patient scheduling, prescription management, and medicine order tracking.
- Implemented multiple CRUD functionalities and developed modules for alert message handling and invoice management.
- Participated in technical discussions before sprint planning and actively contributed to Agile Scrum ceremonies.
- Performed unit testing after development to improve code reliability and application stability.
- Developed Angular components by converting static HTML pages based on JIRA requirements and assisted in integrating Highcharts for data visualization and reporting.
